

# SERENA® PVCS® PROFESSIONAL™ SUITE

## The industry standard for software configuration management

Serena PVCS Professional is the de facto standard for thousands of customers worldwide and offers a comprehensive suite for software change and configuration management (SCCM), consisting of:

- Serena® PVCS® Version Manager™ for version management
- Serena® TeamTrack® for workflow, issue, and defect tracking
- Serena® Builder™ for enterprise production builds

PVCS Professional enables development teams to:

- Achieve better control, insight, predictability, and efficiencies over application development
- Boost team productivity and schedule reliability
- Enforce and audit change processes to support regulatory compliance

### PVCS PROFESSIONAL HIGHLIGHTS

**Customizable process and workflow.** Serena TeamTrack enables teams to define and enforce their workflow to meet organizational objectives such as improved schedule predictability, control over release content, and closed-loop control over change during software development—across all functional team members, regardless of platform or location.

**Flexible, broad infrastructure support.** Deep, rich integrations with VS .NET and Eclipse-based IDEs such as IBM WSAD/RAD enhance developer productivity by allowing developers to conduct their daily activity without having to leave their preferred IDE.

**Parallel development.** Pragmatic locking, synchronization, and differencing/merge engine support contemporary development practices, automatically reconciling and merging multiple changes made concurrently.

**Automated builds.** Serena Builder enables automated software builds, with no scripting required, including remote and cross-platform builds spanning client/server, IBM main-frame, and environments.

### SERENA PVCS VERSION MANAGER

Serena PVCS Version Manager organizes, manages, and protects software assets across distributed development teams. Version Manager is fast and easy to install, use, and administer, yet it provides rich, mature capabilities such as enhanced security, web-based remote access, support for multiple platforms and IDEs, and centrally managed database archives.

### SERENA® PVCS PROFESSIONAL SUITE CONSISTS OF THE FOLLOWING:

- Serena® TeamTrack®
- Serena® PVCS® Version Manager™
- Serena® Builder™

### COMPLEMENTARY SERENA PRODUCTS INCLUDE:

- Serena® Dimensions® Composer™
- Serena® Dimensions® RM
- Serena® Mover®
- Serena® Mariner™

### RELATED SERENA PRODUCTS:

- Serena® Dimensions® CM
- Serena® ChangeMan® ZMF

### SERENA TEAMTRACK®

Serena TeamTrack is the automated way to capture, track, and manage the status of defects, changes, and issues raised in team development. Rich notification rules and the ability to organize and handle multiple issue types enable users to analyze issue dependencies, see progress, spot issue trends, and assign team resources effectively. TeamTrack helps define and enforce processes and capture audit trails required for regulatory compliance.

### SERENA BUILDER™

Serena Builder is the comprehensive, automated build solution for the entire enterprise that accelerates and streamlines application builds. Builder is seamlessly integrated with PVCS Version Manager in the Professional Suite. Two editions of Builder are available for PVCS Professional Suite.
